# RICH I'm a creative **web-application developer** with twenty years' PLASTOW experience working for digital agencies and publishing houses in London and Brighton.

I build beautiful, user friendly, feature-rich **desktop** and **mobile** web apps. I've worked on projects for **the BBC**, **Saatchi & Saatchi**, **EDF**, **Diageo**, **The Daily Telegraph**, **Sony**, **Ford**, **BT** and **the House of Windsor**. I like to push browsers to the limit, often using new technologies like **Web Audio**, **Web Components** and **WebVR** in my work.

I am available for freelance and contract projects, working in-house or remotely.
